

JAVIER ARIAS

+1 (956) 517-3394 | javierariast0@gmail.com | Open to Relocation | [LinkedIn](#) | [Portfolio](#) |

SUMMARY

Junior developer with experience building web apps, data pipelines, and AI-powered tools using Python, React, and Next.js. Delivered production projects end-to-end and led a 4-person Agile team. Bilingual in English and Spanish, open to relocation.

EDUCATION

University of Texas Rio Grande Valley | Edinburg, TX
B.S. Computer Science | GPA: 3.55 | Cum Laude

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Typescript, SQL
Frontend: React, Next.js, HTML5, CSS, Flutter
Backend: Flask, FastAPI, REST APIs
Database & Cloud: PostgreSQL, Supabase
Data & Visualization: Pandas, NumPy, Plotly, Matplotlib
Developer Tools: Git, GitHub, Linux, Agile/Scrum
AI & Automation: OpenAI API, workflow automation

PROFESSIONAL EXPERIENCE

University of Texas Rio Grande Valley | Edinburg, TX
Web Developer & Research Data Assistant | May 2024 – April 2026

- Developed interactive data visualization dashboards using Python, Plotly, and Dash to process and analyze 129+ sociolinguistic interview datasets in real time.
- Engineered ETL pipelines with Pandas to clean, transform, and validate complex research datasets for downstream analysis.
- Maintained and updated 5+ university webpages in Cascade CMS while improving WCAG accessibility compliance across multiple sites.

Fresenius Medical Care | Brownsville, TX
Certified Clinical Hemodialysis Technician (CCHT) | Sep 2018 – March 2026

- Maintained and troubleshooted critical hemodialysis equipment for 20+ patients per shift over 7+ years, diagnosing and resolving system failures under real-time constraints with zero treatment interruptions.

PROJECTS

SmartApply - AI-Powered Job Assistant

Project Manager & AI/API Developer | Jan 2026 – May 2026

- Developing an AI-powered Flask application integrating OpenAI APIs and SerpAPI to analyze job postings, parse resumes, and automate company verification workflows.
- Architected backend AI integration and mock-service testing infrastructure for cost-efficient development; coordinated a 4-person Agile/Scrum team using GitHub workflows.

Blog Notebook - Full-Stack Blogging Platform (Personal Project)

Next.js (App Router), TypeScript, Supabase, Tailwind CSS

- Built a production-ready full-stack blogging platform with Next.js, TypeScript, and Supabase, featuring Markdown publishing, newsletter subscriptions with double opt-in, and real-time analytics dashboards—deployed and publicly accessible.
- Implemented authentication and double opt-in newsletter workflows with Supabase and Resend APIs.
- Developed responsive UI components with Tailwind CSS and App Router architecture.

CoBiVa - Bilingual Language Dominance Dashboard

Software Developer / Researcher | Jun – Jul 2024

- Built an interactive visualization suite (Sunburst, Mirror Pyramid, Scatter Plots) using Pandas and Plotly to map bilingual language trends in the Rio Grande Valley.
- Documented workflows and environment setup for reproducibility in academic research.

ADDITIONAL

Languages: Fluent in English and Spanish
Communication: Event staff volunteer for TEDx Mexico, community theater
